

Goals

1. Students will be clinically competent.
2. Students will demonstrate critical thinking and problem-solving skill proficiency in a variety of patient care contexts.
3. Students will demonstrate effective written and oral communication skills.
4. Students will demonstrate professionalism and ethical behavior.

Student Learning Outcomes

1. Students will position patients accurately to produce diagnostic radiographic images.
2. Students will apply appropriate modifications to imaging based on patient age or physical abilities.
3. Students will modify imaging procedures during a multiple radiographic exam series.
4. Students will evaluate the diagnostic quality of radiographs.
5. Students will practice effective written communication skills.
6. Students will practice effective oral communication skills.
7. Students will demonstrate professional growth and development during the Radiologic Technology program.
8. Students will demonstrate an understanding of the practice of professional ethics in Radiologic Technology.
